

ADDITIONAL INSTRUCTIONS TO ACCESS DATMS FROM A .EDU ENVIRONMENT

Recently, DAU transitioned from a .mil to a .edu environment. Because DATMS is available only via a .mil environment, a workaroud is needed. The screenshots below illustrate the steps *most* people will follow. Depending on your certificate/security settings, you may see something different. If, after following the steps, you do not see DATMS, you may need to close your browser, clear your cache, and start all over with Step #1. Please keep in mind that this workaroud is temporary and new instructions will be updated once a more permanent solution is identified.

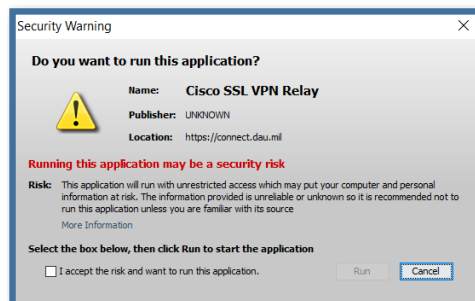

1. Login to <https://connect.dau.mil> via **Internet Explorer**. **NOTE: The Internet Explorer (IE) browser is the only one that works with this workaroud.**
2. Select the “e-mail” certificate associated with your CAC. **NOTE: You may have additional certificates; however, for most people, the email certificate is the only one associated with a .mil email address, which is why it must be selected.**
3. Click the **Continue** button in the “read & consent” pop-up.

4. Select the **DATMS (4E Training Application System)** from the list of provided links. There may be a slight wait time before the screen refreshes.

5. Click the “I accept the risk and want to run the application” checkbox.

6. Click the **Run** button to start the application.
7. Continue to select the “e-mail” certificate associated with your CAC when prompted.
8. From the DATMS home page, click the **Sign-in** button.
9. Select the “e-mail” certificate associated with your CAC. You should then have access to DATMS functionality.
